

# Research experience in Mouse Communication Lab

## HURLEY LAB

We are currently seeking a dedicated undergraduate student to join the Hurley lab team. This person will work directly with graduate student Sierra McAlister on various projects under the umbrella of animal communication. The work is centered on but not limited to the effects of context on communication, multimodal processing, and signal salience.

In this position you would perform basic experiments, prepare the necessary tools for each experiment, collect/process data, and document all findings. An ideal candidate has an interest in conducting scientific research, has organizational skills, time management, and is detail oriented. No prior experience is required.

Send an E-mail message to Sierra McAlister ([siemcali@iu.edu](mailto:siemcali@iu.edu)) for more details or to apply for the job.
